SUMMARY

I am an enthusiastic full-stack developer with over 4+ years of experience in web development, specializing in React, Angular, Spring Boot, and AWS. My expertise lies in building dynamic and responsive web applications, with a keen eye for detail and a commitment to clean coding practices. I am well-versed in RESTful APIs, Git, GitHub, and Agile methodologies, and I maintain a continuous learning mindset to stay up-to-date with the latest technologies. As an effective communicator and collaborative team player, I am committed to delivering high-quality work that meets the needs of clients and end-users alike.

EDUCATION

ST MARY ENGINEERING COLLEGE Hyderabad

Bachelor of Technology
2017 – 2021

SKILLS

- **Frontend Technologies :**
HTML, CSS, Javascript, Typescript, ReactJs, Angular, Nextjs, NGRX, RXJS, SCSS, Bootstrap, MUI, ES6
- **Backend Technologies :**
Spring Boot
- **Databases :**
SQL : MySQL, Postgres
- **message broker :**
Pusher
- **Version Control :**
Git, Bitbucket
- **Web Server Deployment**
 - **AWS :**
S3, cloud front, RDS, EC2
- **Tools :**
 - **Project Management Tools :**
JIRA
 - **Code Hosting Tools :**
Github, Gitlab, Bitbucket
 - **Development Tools :**
Browser Dev
- Console, Visual
Studio Code ,Postman, IntelliJ
- **Third Party Integrations :**
Stripe, Twilio, Zoom

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

Thinkitive Technologies Pvt. Ltd. | July 2021 - Oct 2024

- Full-Stack Development: Expert in building responsive UIs (React, Angular, TypeScript) and robust backends (Java, Spring Boot) within Microservices architectures.
- Project Leadership: Successfully managing the full SDLC for high-traffic applications, including estimation, scheduling, and leading a team of 6+ developers.
- Technical Excellence: Strong focus on Clean Code and TDD; experienced in performance testing, debugging, and resolving complex cross-browser issues.
- Domain Expertise: Specialized in Healthcare systems, ensuring all development meets strict business requirements and industry standards.

ENGINEER

Roche (RIS) | Oct 2024 - Present

- Modular Architecture & Scalability: Expert in building enterprise-grade applications using NX Monorepos and Module Federation, enabling high code reusability and independent scaling of frontend modules.
- Healthcare Data Standards: Hands-on experience with FHIR (Fast Healthcare Interoperability Resources) to ensure clinical data compliance and seamless integration across healthcare platforms.
- Modern Full-Stack Development: Skilled in developing high-traffic applications using NestJS and Java/Spring Boot for backends, paired with React, Angular, and NgRx/Redux for state-managed, responsive UIs.
- Technical Ownership: Responsible for the full SDLC of complex features, from initial design and project estimation to final implementation and performance optimization.
- Quality-Centric Engineering: Dedicated to Test-Driven Development (TDD) and clean code practices to ensure reliability in regulated healthcare environments.
- Problem Solving & Troubleshooting: Proficient in resolving challenging cross-browser issues and optimizing performance for high-traffic web applications.
- Documentation & Collaboration: Experienced in creating clear, comprehensive API documentation and communicating technical specifications to both technical and non-technical stakeholders.

ACHIEVEMENTS

- Received Key Contributor award in 2022.
- Received Best Performer of the year in 2023
